

Tropical Smoothie Café

Remodel and Décor Upgrade

Phase One: Evaluation – We will need detailed photos of your store so that we can determine the quantity of the required décor. We may also need a local electrician to visit the site to determine whether the Turbo Chef Oven will have the proper receptacle and amperage. After all of the information is collected we will give you an itemized proposal based upon the minimum requirements of ‘Tropical Smoothie Franchise Development Corp.’ if you are interested in updating other portions of your store please let us know so that we may include these in your proposal.

Phase Two: Scheduling – After receiving your signed proposal we will order all materials required for your location. Once we receive delivery conformation we will work closely with your Management team so that you are in control of when we start. Once the project is scheduled we will coordinate all sub-contractors and deliveries. Depending on the extent of work to be done a typical store renovation takes five to six days (as many as twelve) and may be done as an ‘Open Store Remodel’ but if you choose you could have a “GRAND REOPENING” as something to encourage your patrons. Please contact your area developer for other options.

Phase Three: Construction – You will be contacted by our coordinator one week before your store begins to verify all scheduling and deliveries. Once construction begins there will be nothing more for you to do, but sit back and watch your store transformed into a Tropical Paradise. Our mission is “To create a fresh look for your store with the least impact to your business” We have been building T.S.C. for over two years and are very confident that you will not be disappointed.
